

rayTEC[®]

CCTV Lighting Test Night

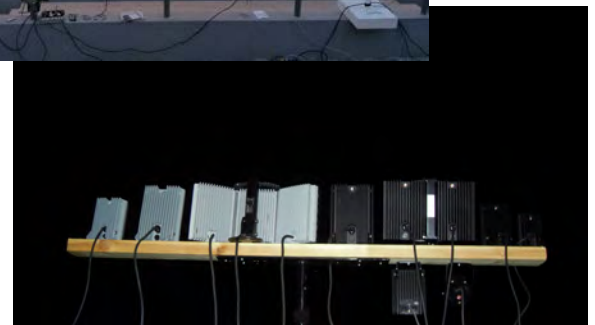

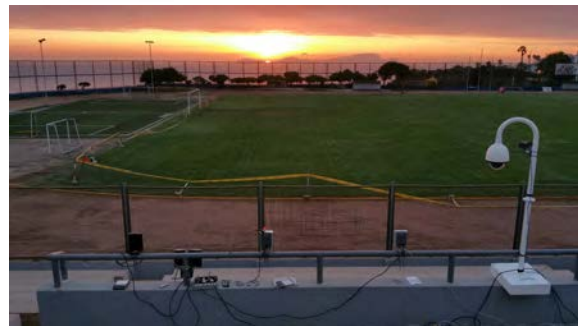

Raytec's CCTV lighting Test Nights provide free educational demonstrations designed to help installers and users of IP video get the most from their system at night when CCTV systems are most vulnerable..

By participating in the test night experience attendees can expect to see:

- The latest advances in night vision technology - including new Network Illuminators from Raytec working seamlessly with thermal imaging technology from Flir and a variety of the latest IP camera technologies.
- Intelligent system design to effectively detect, identify and alert - fully integrated with Genetec and Milestone Video Management Systems.
- How to manage and control your whole lighting installation from any remote network location making it much easier to ensure the best CCTV images at all times.
- How to pre-programme Raytec IP lighting as a smart interactive tool through your VMS, to provide an automatic lighting response to activity on site – designed to deter crime, reduce running costs and environmental impact.

Agenda:

- 5:30pm Social and Refreshments
- 6:00pm RAYTEC Presentation
- 6:20pm Demonstration of IR and WL

Date: Tuesday December 1st

Location:

Thomasson Marketing Group

12425 Mills Avenue, Suite A7 Chino, CA 91710

Time: 5:30pm
